According to the American Cancer Society, men and women living in India have the lowest breast cancer mortality rate of any country in the world. The risk is much higher in the industrialized countries of the Northern Hemisphere, who are more likely to be exposed to environmental risk factors. The Cancer Society of South India states that a diet high in legumes, fruits, and vegetables is protective, as are physical activities, such as dancing, and reproductive factors, such as breastfeeding. Telugu Movie Songs, Popular Telugu Songs Consistent use of a combination of diet and physical activity can help prevent or delay breast cancer. A study published in Cancer Causes and Control in 2009 showed that women in India had the lowest breast cancer mortality rate of any country in the world. Andrea Williams, PhD, MPH, co-author of the paper, said, "Women in India have the lowest rates of cancer and leukemia in the world. "Of all cancers in India, more than 90 percent occur in the rural population, which indicates that dietary, and potentially other, lifestyle risk factors for cancer are likely different than those in the urban population. Breast cancer is the most common cancer in women in India, with some 1. In a recent study in the British Journal of Cancer, researchers looked at 5, women in India and found that they had the lowest breast cancer mortality rate of any country in the world. The risk is much higher in the industrialized countries of the Northern Hemisphere, who are more likely to be exposed to environmental risk factors. A diet high in legumes, fruits, and vegetables is protective, as are physical activities, such as dancing, and reproductive factors, such as breastfeeding. Other nutritional factors that may play a role in the low incidence of breast cancer include: Human breast milk provides nutrients and protective factors for breast cancer; Potassium deficiency is often associated with hypertension, which is a risk factor for breast cancer; Zinc deficiency can also contribute to the development of breast cancer; High phytic acid levels in grains may also interfere with breast cancer development.
